Electric Hi-Tip Dumpers

What We Do

Ecovolve designs and manufactures compact electrical/green machinery. The electric dumper range (ED800, ED1000 & ED1500) from Ecovolve are versatile new machines, capable of operating both indoors and out.

The smallest model (ED800) is less than a meter wide. The largest model (ED1500) is less than 1.2 meters wide. A turning circle of just 1.6 meters/63 inches means the ED range has been designed with tight spaces in mind. It's battery pack will provide enough power for a typical working day on just an 8-hour charge for the ED 800 and a 10-hour charge for the ED1500.

The electric dumper is perfect for use where operating levels must be low while the compact size and small turning circle means the ED can go where others can't.

The ED Range

ED 800

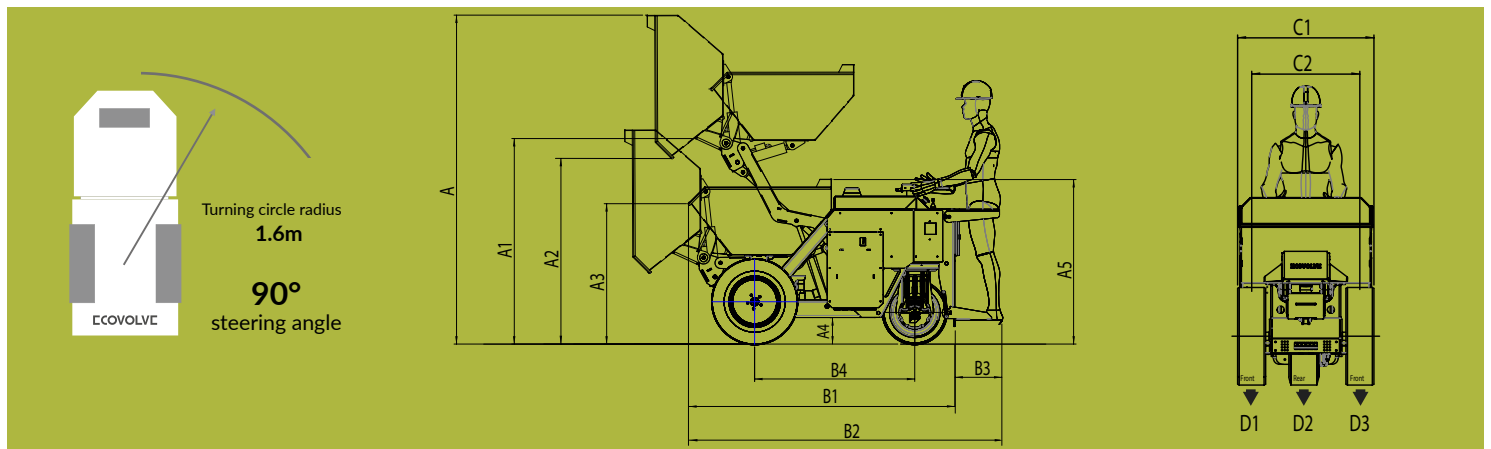

ED 1000

ED 1500

The Electric Dumper Range from Ecovolve is the worlds only fully electric hi-tip dumper. The dumpers are available in three different weight capacities - 800 kg, 1000 kg and 1500 kg skip. There are no fumes, no emissions, low noise and the steering system significantly reduces the risk of unwanted tyre marks. What's more is that the super elastic tyres eliminate the possibility of puncture, making the ED Range suitable for both indoors and out.

You can also order your dumper in custom colours to suit your business colours.

Sales and Distributors

Ecovolve electric dumpers (ED's) are available worldwide and we have distributors in the UK, Germany, France, Belgium, Luxembourg, Switzerland and the United States.

Eco Enterprises Inc.
Boston, USA

We are always looking for new distributor partnerships throughout the world. For any sales or distributor queries, please do not hesitate to contact us. Email info@ecovolve.eu or visit www.ecovolve.eu.

Why Use Us?

The Ecovolve Electric Dumper Range brings these unique features to the market.

Emission Free

Low Noise

High Tip

<1.2 Meter Wide

Remote Control
(Optional)

"Reliable, safe to operate, good capacity and worked well over rough ground. We could not recommend the company highly enough."

"We were amazed how quiet this machine is. We never had any issues with battery capacity even under quite a heavy load and long hours. Would recommend to any modern construction company"
